EDUCATION

University of California, Los Angeles (UCLA) *Jun 2023*
M.S. in Computer Science GPA: 3.700
Relevant Coursework: Machine Learning Algorithms | Quantum Programming | Neural Signal Processing

University of California, Los Angeles (UCLA) *Jun 2022*
B.S. in Computer Science, *Cum Laude* GPA: 3.771
Relevant Coursework: Database Systems | Data Science | Machine Learning | Deep Learning

WORK EXPERIENCE

Software Developer - StableTailor *Apr 2026 – Present*

- Saved users minutes tailoring resumes through AI workflows and job descriptions to automate the process.
- Stored resume data into **PostgreSQL** and hosted in **AWS** through a **Python** backend and a **React** frontend.
- Accelerated development using a Coding Agent (Cursor) to bounce off design ideas and discuss tradeoffs.
- Automated deployment and CI/CD using **GitHub Actions**, **Ansible**, and **Terraform**.
- Streamlined user experiences via a containerized Docker/Redis service to handle authentication workflows.
- Ensured application safety by implementing type checks and validators when filling in resume data.

Software Developer - Epic Systems *Aug 2023 – Aug 2025*

- Reduced hospital expenses by up to $5 million by streamlining document viewing during surgeries.
  - Implemented a document navigator in a full-stack environment in C#, TypeScript, and React.
  - Collaborated in an Agile environment with cross-functional teams to enable access to more nurses.
  - Implemented **ETL**-style data pipelines and data modeling for clinical usage metrics, enabling downstream **analytics** and **reporting**.
  - Engaged on **CI/CD** across large codebase maintained by over 1000 developers.
  - Took initiative creating viewing icons when the UX designers were handling more important matters.
  - Protected medical data from overwrites by implementing a locking mechanism for the active section.
- Saved surgeons and anesthesiologists 5 minutes reviewing patient charts per pre-operative visit.
  - Created backend systems to generate patient summaries using a parallel **AI agent pipeline**.
  - Implemented a RAG mechanism to retrieve patients' medical history to use as a basis for summary.
  - Prompt engineered each AI agent to ensure each summary component adheres to user instructions.
  - Ensured quality summaries by running evaluator agents for clarity, brevity, and accuracy.
  - Created **dashboards** to visualize clinical metrics using proprietary libraries and software.
- Developed and executed unit and integration tests to validate backend functionality.
- Ensured reliability and maintainability of code by participating in over 100 peer code reviews.

SKILLS

Programming Languages: Python | SQL | TypeScript | C# | C++ | R | MATLAB | PostgreSQL | PHP | Verilog | Golang

Frameworks & Libraries: React | FastAPI | GitHub | Docker | GitHub Actions | Ansible | Terraform | Jest
Hosts & Databases: PostgreSQL | MySQL | MongoDB | AWS | Vercel
Software Development: Agentic AI | Agile | Prompt Engineering | CI/CD | Unit & Integration Testing | Defensive Programming | Performance Testing | Reporting | Data Visualization
Soft Skills: Self-Starter | Analytical Thinking | Active Listening | Resilience | Cross-Functional Collaboration

PROJECTS & LEADERSHIP

VoiceBox – Machine Learning Developer *Jan – Jun 2023*

- Used **signal processing** to analyze signal power and frequency derivatives through spectrograms.
- Curated and labeled over 50 voice samples determining assertiveness and charisma.
- Transferred **Python** signal utility functions to a Bluetooth module + web application for convenient use.
- Presented this project at a university-held conference and garnered very-positive reception.

Association of Computing Machinery – AI Projects Committee Officer *May 2022 – Jun 2023*

- Designed a new Natural Processing Language (NLP) track using Insincere Quora Questions.
- Educated NLP topics such as Recurrent Neural Networks and Bag of Words to 30 people through **Colab**.
- Presented to a small cohort of AI enthusiasts Generative AI explaining new endeavors on music and voice.

Splash@UCLA – **Teacher & Administrator** *Sep 2021 – Feb 2022*

- Curated a website that allowed university students to teach high schoolers a subject of their choosing, including scheduling enrollment times and sign-up times.
- Taught high schoolers the periodic table of elements and earned positive reactions playing music games.
